Complex Enzyme for Poultry

SFQ-081

Introduction

According to the characteristics of short digestive tract, fast evacuation of chyme in poultry and the type of feed raw materials, the synergistic catalysis of compound enzyme components can promote intestinal health, improve feed utilization rate, promote animal growth and disease resistance.

Product Component

Cellulase, xylanase, β-glucanase, protease, amylase, mannanase, pectinase, ……

Recommend Dosage

Specific Compound Enzyme for Poultry SFQ-081 CC: 100g/ton of complete feed.

Product Application

1. Enhance the ability of poultry to absorb nutrients per unit time and reduce the nutrient content in feces;
2. Supplementing the deficiency of endogenous enzymes can reduce the viscosity of chyme, promote the digestion of non-starch polysaccharides, and improve the utilization of starch, protein and other substances;
3. Reduce the phenomenon of dirty eggs, improve the cleanliness of eggs;
4. Increasing feed utilization ratio, reducing feed-meat ratio and improving overall homogeneity of meat and poultry.

Packaging and Storage

1. **Package:** 25kg/bag; other package sizes are possible upon request.
2. **Storage:** Keep sealed in a dry and cool place and avoids direct sunlight.
3. **Shelf life:** 12 months in a dry and cool place.

Safety and Handling Precautions

During operation, attention should be paid to preventing contact with eyes or skin. Wash with water in time if contacted.

This product should be stored in a cool, dry and ventilated place to avoid rain and sunshine. Please use it in time after opening the bag. If you can't use it all at once, please tighten the mouth of the bag.

Serve you wholeheartedly

As a leading enzyme manufacturer in China, we provide you with comprehensive technical support;

Provide a variety of single enzyme detection methods and free enzyme activity detection training;

Provide reference opinions on feed formulation adjustment and related technical services.
